

02 pprint

April 14, 2019

```
In [1]: from pprint import pprint
```

```
In [2]: a_long_list = [{'bio': 'Stefan has been using Python since the beginning of the century'}]
```

```
In [3]: print(a_long_list)
```

```
[{'bio': 'Stefan has been using Python since the beginning of the century and is probably best'}
```

pprint (pretty print) is a convenience function for readability

```
In [4]: pprint(a_long_list)
```

```
